

NOTES

I used 3/16 X 2" steel dowel pens for the 3 hinge points.

I glued a 3/4 X 3/4 x 1/4" piece of nylon to the end of the ram and to each side of the stop block. The stop can be flipped to give +/- 1/2" to depth.

I used a 1/4 X 1 1/2" steel dowel on the stop block.
